PROFILE

Computer Science undergraduate focused on Cybersecurity and Full Stack Web Development with hands- on experience in penetration testing, vulnerability assessment, and building secure web applications using Python and JavaScript

EXPERIENCE

05/2025 – 07/2025 **IoT Intern**
Jawaharlal Nehru University, New Delhi
- Developed password strength checker web application using HTML, CSS, JavaScript
- Implemented secure password generator and OTP simulation module
- Performed real-time password security evaluation to detect weak credentials
- Applied secure authentication and cybersecurity awareness concepts

05/2026 – 07/2026 **Data Science Intern**
Celebal Technologies, Jiapur
- Developed machine learning and data analysis projects using Python. Performed data cleaning, feature engineering, EDA, and model evaluation.

EDUCATION

2023 – 2027 **B.Tech - Computer Science & Engineering**
JK Lakshmipat University, Jaipur

2013 - 2022 **Senior Secondary (CBSE)**
Army Public School, Kota
- 88%

SKILLS

Programming
Python, C, SQL, JavaScript, C++

Security Tools
Nmap, Wireshark

Web Development
HTML, CSS, Java Script

Operating Systems
Linux (Kali Linux), Windows

Cybersecurity
Network Security, Threat Detection, Vulnerability Assessment, Ethical hacking Fundamental

Networking
TCP/IP, OSI Model, Subnetting, DNS, HTTP/HTTPS

Database
MongoDB

INTERESTS

- Cybersecurity
- Penetration Testing
- Web Development
- Network Analysis

PROJECTS

Web Penetration Testing Tool, DriveWise — Metadata-Aware Automotive RAG Assistant

- Built Python & Flask based web vulnerability scanner for security auditing
- Implemented crawling, port scanning and HTTP header analysis modules
- Generated automated vulnerability reports
- Integrated Google Gemini API to provide remediation and secure coding suggestions

Spam Email Detection using Machine Learning

- Developed spam classifier using TF-IDF, Naïve Bayes and Logistic Regression
- Performed preprocessing: tokenization, stop-word removal and feature extraction
- Evaluated performance using accuracy and precision metrics

Student Credit Card Management System

- Developed secure financial management system using Python & MySQL
- Implemented authentication, transaction tracking and card blocking features

Data Science Project - SDG 7 Clean Energy

- Analyzed renewable energy adoption trends using statistical and ML techniques
- Visualized insights using Python libraries

CERTIFICATIONS

- Red Hat System Administration I (RH124)
- Python Programming
- Risk Management for Cyber Security Managers
- Spark Fundamentals I
- Introduction to Cybersecurity
- C Programming
- Governance, Risk, and Compliance
