PROFESSIONAL SUMMARY

Cybersecurity-focused B.Tech Computer Science and Engineering student with project experience in web security testing, OSINT tooling, password security, and applied cryptography. Built a Python/Flask web testing tool and BlackEye, a React/FastAPI OSINT dashboard. Practising security tools and networking fundamentals, with a strong interest in penetration testing, vulnerability assessment, and application security.

TECHNICAL SKILLS

Offensive Security: Network Reconnaissance**,** OSINT, Vulnerability Scanning, Nmap scanning, Web security testing, and Penetration testing fundamentals, XSS

Defensive Security: Security monitoring fundamentals, network traffic analysis with Wireshark, security awareness, and incident-response concepts

Networking & Protocols: TCP/IP, ARP, DNS, NetBIOS, SSH, FTP, SMB, RTSP, RDP, REST APIs

Tools & Systems: Nmap, Burp Suite, Metasploit, Wireshark, Kali Linux, Try Hack Me, Red Hat

Programming: Python, C, C++, JavaScript, Node.js, React, Flask, FastAPI

Database: MongoDB, MySQL, Firebase, Git

EXPERIENCE

Data Science Intern | Celebal Technologies, Jaipur | May 2026 – July 2026

- Built Python-based data analysis and machine learning projects involving data cleaning, feature engineering, exploratory data analysis, and model evaluation.

IoT Intern | Jawaharlal Nehru University, New Delhi | May 2025 – July 2025

- Developed a password strength checker using HTML, CSS, and JavaScript, with a password generator and simulated OTP verification workflow.

CYBERSECURITY PROJECTS

Web Penetration Testing Tool | Python, Flask, Gemini API

- Built a web security testing tool with website crawling, port scanning, and HTTP security header analysis; integrated Gemini API for remediation guidance and secure-coding suggestions.

BlackEye — OSINT Intelligence Dashboard | React, FastAPI, Python, SQLite

- Built a full-stack OSINT dashboard for IP geolocation, domain reconnaissance, and phone-number and username intelligence, with 3D globe visualization and SQLite-backed scan history.

Threshold Cryptography Digital Vault | AES-256, Shamir Secret Sharing, Feldman VSS

- Developed a digital vault combining AES-256 encryption with Shamir Secret Sharing and Feldman Verifiable Secret Sharing to support threshold-based recovery and share verification.

Password Strength Checker Web Application | HTML, CSS, JavaScript

- Evaluated password strength in real time and implemented password generation and simulated OTP verification.

EDUCATION

B.Tech, Computer Science & Engineering | JK Lakshmipat University, Jaipur | 2023–2027

CERTIFICATIONS, TRAINING & ACHIEVEMENTS

- TryHackMe: Completed 72 hands-on rooms covering cybersecurity concepts and practical challenges. Ranked in the **top 7%**
- Red Hat System Administration I (RH124)
- Introduction to Cybersecurity
- Governance, Risk & Compliance
- Risk Management for Cyber Security Managers
